MOHAMMAD ZEESHAN

JAVA BACKEND DEVELOPER | SOFTWARE ENGINEER | SPRING BOOT | REST APIs

Noida, India | +91-9628995757 | zeeshannid12@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Java Backend Developer with 2 years 4 months of full-time C-DAC experience plus a 7-month paid internship. Built healthcare modules, REST integrations, and 40+ end-to-end reports using Java 8, Spring Boot, JSP, SQL, and PostgreSQL. Improved database performance, workflows, and security, contributing to a 24x faster data-processing run.

PROFESSIONAL EXPERIENCE

Project Engineer - Java Backend Developer Aug 2024 - Present
Centre for Development of Advanced Computing (C-DAC) *Noida, India*

- **Backend engineering:** Built an end-to-end child immunization module with vaccine master data, newborn schedule mapping, due-dose notifications, and vaccination tracking.
- **Enterprise reporting:** Developed 40+ healthcare reports using Java, JSP, SQL, Struts2, and BIRT; implemented Controller, VO, DAO, helper/utility layers, dynamic filters, RPT layouts, and HTML/Excel exports.
- **REST APIs and scheduling:** Integrated eTAAL, VITAL, and PICME services and implemented Quartz jobs to synchronize records across multiple databases.
- **24x faster processing:** Contributed to migration of scheduled data synchronization to Python-based Apache Airflow, reducing a recurring run from ~10 minutes to 25 seconds.
- **Performance optimization:** Partnered with EY engineers to address JMeter findings, database connection leaks, redundant API calls, and slow SQL through query tuning, indexing, partitioning, and date-filter improvements.
- **Application security:** Remediated vulnerabilities and WAR-level dependency issues across applications for 19 AIIMS hospitals, a Tamil Nadu blood-bank system, and ~20 mobile apps.
- **Production readiness and leadership:** Coordinated Safe-to-Host assessments, retesting, and security clearance with vendors and deployment teams; guided two junior engineers in reporting and security remediation.
- **Current initiative:** Contributing to a centralized ticket management platform (Java 8, Spring Boot, React.js, PostgreSQL) for PRs, CRs, blockers, testing, and production deployments.

Software Engineer Intern (Paid) Jan 2024 - Aug 2024
Centre for Development of Advanced Computing (C-DAC) *Noida, India*

- Designed four frontend screens and the end-to-end request workflow for a hospital Laundry Management module, including item availability, department-based supply requests, and an operational report.

SELECTED PROJECT

Real-Time Chat Application Personal Project

- Built room-based messaging using Java, Spring Boot, WebSocket/STOMP, React.js, and PostgreSQL for persistent chat history.

TECHNICAL SKILLS

Languages & backend: Java 8, SQL, JavaScript, Spring Boot, Spring MVC, REST APIs, Spring Data JPA, Hibernate
Database & performance: PostgreSQL, Oracle, MySQL, SQL optimization, indexing, partitioning, stored procedures
Integration & reporting: Quartz, Apache Airflow, Python, ETL, database synchronization, JSP, Struts2, Eclipse BIRT
Security & tools: JMeter, Burp Suite, OWASP remediation, Maven, Git, WildFly, Docker, Spring Security, JWT

EDUCATION

Master of Computer Applications (MCA) 2022 - 2024
Guru Gobind Singh Indraprastha University

B.Sc. Mathematics & Computer Science 2017 - 2020
Jamia Millia Islamia

AWARDS & RECOGNITION

Director General C-DAC Award (2026) - Excellence in Process and Project Management
C-DAC Letter of Appreciation (2025) - Contributions to secure application development
